EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Frank Nicholas on 2/28/06.

2. The application has been amended as follows:

17. (Currently Amended) A system for operating a telematics unit within a mobile vehicle, the system comprising:

means for receiving an incoming call signal, the incoming call signal including an origin identifier;

means for determining a first answer mode when the origin identifier is within a predetermined group of origin identifiers, and determining a second answer mode when the origin identifier is not within the predetermined group of origin identifiers wherein the predetermined group of origin identifiers is a call center identified group of origin identifiers, and wherein the incoming call signal is routed to a vehicle communication unit if the origin identifier is within the call center identified group of origin identifiers and wherein the incoming call signal is routed to a user interface if the origin identifier is not within the call center identified group of origin identifiers;

Art Unit: 2688

means for determining an answer mode based on the origin identifier of the incoming call signal;

means for initiating the answer mode responsive to the answer mode determination;

and means for operating the telematics unit based on the initiated answer mode.

(End of Amendments).

Examiner's Statement of Reasons for Allowance

3. Claims 1, 2, 4-10, and 12-17 are allowed.

4. The following is an examiner's statement of reasons for allowance:

Applicants invention is drawn to automated call routing using call center identified origin identifier within a telematics equipped mobile vehicle that includes receiving an incoming call signal, the incoming call signal including an origin identifier, determining an answer mode based on the origin identifier of the incoming call signal, initiating the answer mode responsive to the answer mode determination, and operating the telematics unit based on the initiated answer mode. Origin identifiers may include an automatic number identifier and a digital signature. The step of determining the answer mode may include determining a first answer mode when the origin identifier is within a predetermined group of origin identifiers and determining a second answer mode when the origin identifier is not within the predetermined group of origin identifiers.

Applicants independent claims 1, 9, and 17 each recite, *inter alia*, determining a first answer mode when the origin identifier is within a predetermined group of origin identifiers, and determining a second answer mode when the origin identifier is not within the predetermined group of origin identifiers wherein the predetermined group of origin identifiers is a call center identified group of origin identifiers, (as defined in specification Pages 6-7 and 15), and wherein the incoming call signal is routed to a vehicle communication if the origin identifier is within the call center identified group of origin identifiers unit, as defined in specification (Page.15;25-Page.16;5), and wherein the incoming call signal is routed to a user interface if the origin identifier is not within the call center identified group of origin identifiers, as defined in specification (Page.12;1-15). These steps, in combination of the remaining steps, are neither taught nor suggested by the prior art.

Accordingly, Applicants claims are allowed for these reasons and for the reasons recited in Amendments filed 2/17/06 and 10/14/05.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
